ESSENS SLOW LIVING

The Slow Living product line will warm your soul and help you enjoy the peace and magic of the present moment.

The basic vision was to prepare such products that will minimise the disruptive elements of our hectic life and to help strengthen the balance and harmony of the body. All of that combined together leads to an improvement of the overall condition, that is, body, soul and mind.

100% natural essential oils were designed to soothe and create a pleasant atmosphere with the help of the concentrated power of herbs. They are ideal for relaxation, massages, cosmetics and baths.

Essential oils are highly concentrated, volatile aromatic substances that are obtained from various parts of plants. They can be found in leaves, roots, flowers, seeds and even bark. They add aroma to plants, protect them from danger, help them with pollination and are very rich in a lot of different effective and medical substances.

THE BEAUTY OF AROMATHERAPY

Aromatherapy has strong therapeutic properties and rightly ranks among one of the types of alternative medicine, literally meaning "scent treatment".

Aromatherapy has a positive effect on our nervous system and emotions, supports immunity and helps with health problems. Individual essential oils serve to improve the overall condition of the body and soul, yet they have different therapeutic effects. With a properly chosen essential oil, it is possible to achieve relief from a number of health and mental problems.

HOW TO USE THE ESSENTIAL OILS?

Inhalation: You can drip small amounts of oils into aroma lamps or diffusers. You will enjoy the scent of the interior and create a pleasant mood according to the specification of each individual oil. It can also be combined with water to use in sprays and used as a home spray or to scent your pillows.

Massage: By massaging the oils into the skin you will achieve a pleasant feeling of relaxation, and thanks to the benefits of the specific oils, you can fully enjoy the power of these 100% natural oils. It is suitable for foot massage, relaxing the neck area and muscles, massaging into the temples or can be used with a compression bandage. When applied to the skin, use it in very small doses (1 - 2 drops), sensitive persons may dilute with another carrier oil, such as coconut oil.

Cosmetics: Mix the oil with your favourite facial or body cream (1-2 drops are sufficient, but we recommend testing on a smaller sample first).

Bath: Add 3-5 drops to the bath or spray it onto the shower wall and enjoy the aroma created through the water vapor.

ESSENS GUA SHA

Gua Sha stones have been used in traditional Chinese medicine for thousands of years, for relaxation and pain relief. It is a natural alternative therapy that is based on the principle of rubbing and massaging the skin, which leads to better blood circulation, promoting lymph flow and removing toxins from the body. Gua Sha stones should always be used with a cream, serum or oil as a base and for better "glide" on the skin.

Facial massages reduce circles and bags under the eyes, prevents wrinkles and firms the contours of the face. Massages of other parts of the body serve to stir up energy, increase blood circulation and relieve tension in stiff muscles. The stones themselves are also cooling, which has a positive effect on eliminating swelling.

ESSENS GUA SHA CRYSTAL

Crystal is a powerful stone, boosts energy, cleanses and harmonises. Clears and calms the mind.

ESSENS CANDLE

Candles will elevate your cozy home decorations and scent your home. They are also a beautiful gift for your loved ones at any time of the year.

Special attention is given to each ESSENS Slow Living candle. They are made by hand casting, careful immersion of the wooden wick and gradual cooling. There is also a manual placing of the label and they are packaged in an elegant box.

Candles contain only natural vegan ingredients, led by soy wax, supplemented with certified palm wax from plantations grown for this purpose only. This special wax mixture burns cleaner and slower, which significantly extends the burning time for up to 50 hours. The fragrance component is provided by natural essential oils in such a ratio that the resulting scent is pleasant and non-irritating. The wooden wick enables the optimal release of a pleasant scent into the air and, thanks to the effect of a crackling fire in the fireplace, evokes a relaxing atmosphere.

HOME	CLEAN

ESSENS HOME CLEAN

Detergents play an important role in a modern society. They deliver hygienic cleanliness and are so very important to everyone's health. The ESSENS Home Clean product line is very safe and consists of highly concentrated products and those that are ready to use.

CLEAN HOME = HEALTH AND COMFORT

The complete range has been developed based on the latest trends with the help of state-of-the-art technology and leading experts in its field. The greatest emphasis was placed on the maximum safety of all products and their convenient use by the consumer. All stages of production are subject to the highest level of control in accordance with applicable European Union standards, which provide ISO 9001, ISO 14001 and OHSAS 18001 quality certificates.

ESSENS HOME CLEAN PRODUCTS ARE AMONG THE SAFEST PRODUCTS WITH THE BEST QUALITY OF THEIR KIND ON THE WORLD MARKET.

High efficacy is achieved by suitably selected components in the best possible ratio, which are environmentally friendly since they are biodegradable.

Practical packaging of concentrates in square litre bottles saves not only the wallet, but also storage space in the house.

Carefully selected accessories ensure easy handling. The dispenser pump, available separately, is designed to release 3 ml of fluid at a time and maximises the measurement of the recommended amount of all concentrated products. A 500 ml dilution bottle with a mechanical mist or foam spray is an optimal tool for diluting concentrates to the recommended density for immediate use. In order to avoid confusion of diluted products, we also offer a set of labels, sold separately, suitable for use on dilution bottles.

THE FOUR KEY BENEFITS OF ESSENS HOME CLEAN INCLUDE:

High efficiency

Financial savings

Quality
and practicality

Environmentally
friendly

ARE YOU FAMILIAR WITH OUR SIGNS?

CONCENTRATED

The highly concentrated composition of ESSENS Home Clean products brings many benefits. Financial savings - the concentrates are diluted with water according to the recommended dosage, for a long period of time no additional costs are needed for the purchase of detergents. Storage saving - square-litre bottles for easy storage and practical dilution bottles for simple application save not only storage space but also reduce storage weight. Environmentally friendly - not only biodegradability, but also less plastic packaging, as well as lower transport frequencies, significantly reduce the impact on the environment.

READY TO USE

Although concentrates are very practical, they are not suitable for all detergents. That's why our assortment also includes products suitable for immediate use with no need to dilute. These products have been labelled with a sign "ready to use" for ease of reference. Likewise, this sign is also visible on dilution bottle labels, designed for individual sale.

BIODEGRADABLE

ESSENS Home Clean products are biodegradable. They contain no toxic substances and are therefore not only friendly to our health but also to the environment.

DERMATOLOGICALLY TESTED

However, ESSENS Home Clean products are developed so that they are dermatologically safe, they do not harm the skin even in case of accidental contact or insufficient rinsing of detergents from the fabric.

VEGAN

ESSENS Home Clean products do not contain any ingredients of animal origin, including dyes, silicones or proteins. At the same time, they have not been tested on animals at any stage of a production.
